Finalize your mock-up and start to Implement it and make the structure of your web site using HTML elements.

On here you have to focus on, how to use the relevant HTML elements to relevant parts which suits for the each sections.

❖ Task One
Use the following function groups elements to structure your mock-up design.
- Main root
- Document metadata
- Sectioning root
- Content Sectioning
- Text Content.
- Inline text semantics.
- Image and multimedia
- Embedded content.
- Table content
- Forms

Note:-
On here don't use any type of tools for this process, and also don't use any CSS or CSS framework. Only structure your design with relevant HTML elements.

Tools:-
✧ IDE
  ■ Intelijj IDEA

Example:-

```html
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <title>Home Page</title>
</head>
<body>
<header>
    <nav>
        <ul>
            <li>Home</li>
            <li>Services</li>
            <li>Contanct US</li>
        </ul>
    </nav>
</header>
<main>
    <nav></nav>
    <section>
        <h1>Dashbord</h1>
        <h2>Content of dashboard</h2>
    </section>
    <section>
        <h1>Customer</h1>
        <h2>Content of Customer</h2>
    </section>
    <section>
```
